OKLAHOMA Transportation

FFY 2024-2031 Eight-year Construction Work Plan

The Oklahoma Department of Transportation is pleased to provide the Federal Fiscal Year 2024-2031 Eight-Year Construction Work Plan, which contains critically needed transportation improvement projects for our interstates, U.S. and state highways and bridges. Oklahoma's highway and bridge network serves as the backbone of the state's economy, moving people to work and goods to market while connecting Oklahoma with the nation and the world. A modern and efficient transportation system is essential to sustain a strong economy and improve quality of life for all Oklahomans.

The department's eight field district engineers identified the projects in the 2024-2031 Eight-Year Construction Work Plan with continuous input from many stakeholders and approval from the Oklahoma Transportation Commission. The department developed the inaugural eight-year plan in 2002 and updates it annually based on conservative funding forecasts. The plan guides ODOT's project development and delivery strategies.

Thanks to the Oklahoma Legislature's ongoing commitment to transportation, state funding in the Rebuilding Oklahoma Access and Driver Safety (ROADS) Fund has allowed ODOT to make significant improvements to the state's highway infrastructure, especially structurally deficient bridges. From 2004 to 2021, Oklahoma improved from 49th to 5th in the Nation for highway bridge condition and this updated plan reflects the commitment to addressing bridges at risk of becoming structurally deficient to maintain the state's good bridge status.

For this plan, the Oklahoma Legislature provided the largest single appropriation in ODOT history with the Rural Economic Transportation Reliability and Optimization (RETRO) Fund. This additional \$200 million allowed ODOT to prioritize investments in rural areas that strengthen economic hubs throughout the state. Even though challenged with historical inflationary pressures and increased regulatory hurdles, the addition of the RETRO funds allows for this to be the largest construction work plan in ODOT history, both in impact and investment.

Oklahoma strives to be a Top 10 State in other areas of transportation infrastructure by addressing rural two-lane highways with deficient shoulders, improving highway pavement conditions and continuing to focus on highway bridges. This updated plan addresses 1,100 miles of rural two-lane highways with deficient shoulders with much needed-safety upgrades, and improves 3,789 lane miles of highway pavement to a state of good repair. Also, in an effort to sustain the momentum and desired goal of maintaining a less than 1% structurally deficient bridge inventory, the plan addresses 290 bridges currently at risk of becoming structurally deficient. The plan targets 643 highway bridges for reconstruction or major rehabilitation. Altogether, the plan contains approximately 1,738 projects valued at nearly \$8.8 billion.

On behalf of Governor Stitt, ODOT and our many partners who help us succeed in our mission to provide a safe, economical and effective transportation network for the citizens, commerce and communities of Oklahoma, I am honored to present the FFY 2024-2031 Eight-Year Construction Work Plan.

Tim Gatz
Oklahoma Secretary of Transportation
Oklahoma Department of Transportation Executive Director

**BUDGETARY
PROJECTIONS**

Budgetary Projections

CONSTRUCTION WORK PLAN - FFY 2024 through FFY 2031

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Construction Work Plan were established through a systematic evaluation of the Department's anticipated State-Aid and Federal-Aid revenues and expenditures. Projections were performed for Federal Fiscal Years 2024 – 2031 with the Federal Fiscal Year defined as beginning October 1st and ending on September 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State, Federal and Interstate highway system improvements and does not address Department initiated set asides or other mandated programs.

For the purposes of the initial projections, an estimated baseline State-Aid amount of \$351.26 million and an estimated Federal-Aid amount of \$668.63 million was utilized as the Fiscal Year 2024 benchmark. The Federal-Aid amount includes a 7.5% projection overstatement to avoid any potential loss of future Federal-Aid funds due to under programming. Of particular note, the annual baseline State-Aid amount available for Construction Work Plan projects will average \$401.64 million over the next eight years.

As the Federal-Aid benchmark amount will vary based upon the results of the annual Congressional budgeting process, the estimated projections will require further adjustment and we will adapt our Construction Work Plan accordingly.

Once the Statewide projections are recorded by Fiscal Year, the following formula is applied to establish a baseline Fiscal Year projection for each Field District:

$$\frac{\% \text{ of Population} + \% \text{ of Mainline Highway System Miles} + \% \text{ of Previous 15 Year Const. Program}}{3}$$

This formula considers common demographic, physical and historical criteria and yields a Divisional percentage that renders an equitable distribution of the available funds.

CORRIDOR PLAN PROJECTS

The budgetary projections for Federal Fiscal Years 2024 - 2031 are adjusted accordingly to reflect the debt service requirements of the Corridor Plan projects.

The individual project estimates exemplified in the Construction Work Plan constitute approximately 100% of the Federal Fiscal Years 2024 - 2031 anticipated available State and Federal formula funds including the 7.5% overstatement of Federal-Aid and excludes the Corridor Plan debt service.

Balancing Process

The balancing of the Construction Work Plan progressed in accordance with the roles and responsibilities generally defined in the following outline:

Field District Engineers

The development of Construction Work Plan begins with our Field District Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Districts. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility. In addition, other key Department Divisions collect and analyze transportation data factoring the following general characteristics as applicable and listed in no particular order:

- surface condition
- bridge condition
- geometrics (vertical and horizontal alignment)
- average annual daily traffic (AADT)
- percentage of truck traffic
- accident history
- local, regional and national traffic patterns
- capacity

The understanding gained from this information is then coupled with the careful consideration of the Field District's condition and capacity assessments of the highway network and the associated critical needs, their anticipated improvement budgets, and further communication with the District's Transportation Commissioner. The Field District Engineers then review and validate the scheduled Construction Work Plan projects and formulate a group of new projects to be added in accordance with the projected funding availability.

Planning Branch in Government Affairs

The Planning Branch is responsible for coordinating the State's transportation planning efforts with those of Oklahoma's Metropolitan Planning Organizations, and consulting with the tribal governments and local officials with responsibilities for transportation. The development of the Long Range Plan, the maintenance of the Statewide Transportation Improvement Plan as derived from the first four years of the ODOT Eight Year Construction Work Plan, Corridor Studies, as well as early project development all include opportunities for public participation and review. The results of this public involvement, input from ongoing coordination and consultation, and the planning documents are provided to the Field District Engineers for their consideration as the Work Plan is developed.

Project Management Division

The Project Management Division works directly with and assists the Field District Engineers in the development of their respective District's Construction Work Plan and in the subsequent daily management of the project development activities. Projects proposed by the Field District Engineers that did not previously exist in the Construction Work Plan are

validated to the extent possible in order to institute a preliminary scope, schedule and budget. Concurrently and to the extent possible, the scope, schedule and budget of projects that previously existed in the Construction Work Plan are re-validated.

The Project Management Division then continues to facilitate necessary modifications to the scope, schedule and/or budgets of approved Construction Work Plan projects as more detailed information becomes available during the course of Project Development. Validation of projects is accomplished through drive outs and/or other project team meetings with the complete participation of appropriate Engineering and Operations Divisions as deemed necessary. The responsible Project Manager schedules, coordinates, documents and facilitates these meetings.

Director, Deputy Director and the Chief Engineer

The Director, Deputy Director and the Chief Engineer, in concert with the Director of Project Delivery and Design, Director of Operations, the Comptroller Division, the Project Management Division and the Field District Engineers work to fiscally constrain and balance the Construction Work Plan in accordance with the allocation requirements of the applicable Federal funding categories. The Work Plan balancing is performed with foremost consideration for maintaining the integrity of the Field District Engineer's and the Transportation Commissioner's project priorities. In addition, the balancing process seeks to ensure that each Field District is allocated available funding in accordance with the aggregate State and Federal budget projections.

ADDITIONAL CONSIDERATIONS

Given the number of extreme variables and the inherent need to maintain a balance between available funds and the District funding commitments, the final District projections are adjusted within a given year. Any adjustments are initiated with consideration for the on-going debt service requirements of the previous Corridor Plan projects, the ability to schedule and prepare projects for construction in the appropriate Federal-Aid funding categories and the ability to sustain a reasonable annual Construction Work Plan in each District.

The Construction Work Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

The Comptroller Division and the Project Management Division will work in concert with the Field District and Central Office Divisions to continue the monitoring and management of the Construction Work Plan in accordance with the provisions of the Construction Work Plan Management Process.

CONSTRUCTION WORK PLAN SUMMARY REPORT
