

ENDNOTES

ⁱ In this application we consider “Advanced Mobility” to be intersection of Advanced Aerial Mobility (“AAM”) (manned and unmanned), advanced batteries, and electrification of ground mobility.

ⁱⁱ Based on an analysis using [EMSI input-output model multipliers](#).

ⁱⁱⁱ Calculated based on [targeted industry occupation mix and EMSI data](#).

^{iv} Employment location quotients for the region include: Oil & gas extraction: 8.2, Natural Gas Distribution: 3.2, Coal Mining: 1.3, Support Activities for Mining: 2.4 based on data from EMSI

^v United States coal mining employment fell from more than 175,000 in 1985 to roughly 40,000 in 2020. As the Interagency Working Group is prioritizing the immediate needs of coal mining and power plant communities, the Working Group also is coordinating, identifying, and delivering federal resources to all Energy Communities, fence line communities and Tribal communities. <https://energycommunities.gov/> <https://netl.doe.gov/>

^{vi} This includes negative impact of 103 jobs from the conversion of the fuel fleet at PSO’s coal plant in Oologah, 100 jobs from OG&E’s fuel fleet conversion at its coal plant, and 65 jobs from the shutdown of one coal unit and retrofitting of another at the GRDA coal plant at MidAmerica Industrial Park in Pryor.

^{vii} 2019, American Community Survey, unemployment for Tulsa MSA residents with a bachelor’s or higher was 2.4% and 4.4% for residents with a high school diploma

^{viii} OK state median averages calculated based on average of median wages for occupations in OK state through EMSI. Tulsa MSA data is direct pulled through EMSI, Tulsa Regional Chamber

^{ix} Including [EMSI industry multipliers](#).

^x Calculated based on survival rate, company size, average market valuation of start-ups in transportation industry using BLS and Pitchbook data. We have incorporated a 50% haircut for conservative estimation

Coalition Members

- City of Tulsa
- Tulsa Authority for Economic Opportunity
- Indian Nations Council of Governments
- Osage Nation
- Oklahoma State University
